

Mark your calendars today and plan to join your colleagues May 27-30 in Quebec City for e-Health 2007. Bigger and better than ever, the 2007 event marks the first time in e-Health history that the conference will be held outside of British Columbia or Ontario. This change has created a real 'buzz' in our health informatics community. In addition to exploring the unique history and culture of Quebec City, conference delegates are excited about renewing old friendships and meeting new people with whom they can share their experiences.

The Conference Program – Awesome

e-Health 2007 marks another first – e-Health 2007 has set a record for the most number of abstracts submitted. For the first time the number of proposals received exceeded 300. This unprecedented response speaks to the amount of activity that is going on across the country in the e-health space. For conference delegates, the response to the call for abstracts means that the conference program will be exceptional, with something for everyone.

To support the Program and expected audience, simultaneous translation will be available for all plenary sessions. Concurrent sessions will be presented in the language in which the abstract was submitted (i.e. French or English).

The Conference Facility and Exhibit Hall – Bigger and Better than Ever

The Quebec Conference Centre can easily accommodate the growth that the e-Health conference has seen over the years. With meeting rooms and exhibit halls set out over 232,000 square feet, there are no worries about outgrowing this venue in 2007. Located in the heart of a 400-year-old city, steps from the fortifications which crown the Old Town, the Québec City Convention Centre is directly linked by underground passageways to two major hotels, indoor parking, and a shopping centre. The exhibit hall, which is centrally located to other conference venues, will feature 20% more booths than last year in addition to Canada's First Interoperability Showcase.

The Internet café will provide an area for delegates to check in with the office or home from the comfort of the exhibit floor. Several hotels are adjoined or nearby the conference centre, however book both your flights and hotel space early to ensure your choice in travel and lodging.

The conference organizers are still pursuing a number of networking opportunities to augment your Conference Program. In addition to our traditional Welcome reception and Social Evening, other potential prospects include a fun run and special interest group meetings. Visit the Conference website for future updates.

New this Year - Canada's First Interoperability Showcase

An interoperable EHR is on the minds of many conference delegates and this year we will host the first Canadian Interoperability Showcase. Featuring cutting-edge technology and standards within an interactive environment delegates will be personally toured through the Showcase where infrastructure, enterprise registry and diagnostic imaging vendors will exchange "your healthcare data" immediately, accurately and appropriately. This Showcase will demonstrate a realistic scenario with multiple acts, actors and scenes that follow the proven profiles of standards. Get your playbill early in your trade show visit and follow the action at the e-Health Interoperability Showcase 2007.

New this Year – 5K Fun Run

To balance all of the mental stimulation that you'll receive at the conference, we're planning some physical activity as well. All runners and walkers are invited to join us on Monday morning to start the day with a 5K tour of the convention centre and environs.

About Quebec City

Nature has been a generous contributor to Québec City's appeal. The very heart of the Québec City region is the St. Lawrence River, which arrives in a flourish from Montréal, squeezes through the Québec-Lévis narrows under the cliffs of Upper Town, then rushes on to the Atlantic in a widening expanse of water and nature. This unique combination of geography adds to the region's scenic appeal.

Located in the St. Lawrence River Valley, Quebec City is divided into two distinct parts—one perched high on the promontory overlooking the river, the other down by the shoreline where the first settlement was built.

Conference Hosts:

e-Health 2007: Paths to Transformation is jointly hosted by the Canadian Institute for Health Information (CIHI) and COACH: Canada's Health Informatics Association. Now in their eighth year of collaboration, these organizations continue to offer proactive top-quality learning and an opportunity to network with organizations and people that value quality health information as well as effective integrated system solutions.

Want to make the point that the exhibit hall is central to the action –not located far from conference plenary and concurrent sessions.

Please confirm and revise wording as appropriate.

Please confirm that 1) there will be an internet café and that 2) it will be in the exhibit hall or delete

e-Health 2007 Paths to Transformation

e-Health 2007 En route vers la transformation

*May 27th – May 30th
Quebec City, Quebec, Canada*

*27 mai au mercredi 30 mai
Québec (Québec), Canada*

2007 Conference Tracks

- Use of EHR
- EHR: Beyond Clinical Care
- Privacy, Security, Ethical and Legal Considerations
- E-enabled Access
- Human Factors and Change Management
- Innovation and Sustainability

Conference Highlights

- Unparalleled Advances in Electronic Health Records
- Expanded Trade Show (120 booths)
- 1st Canadian Interoperability Showcase
- An evening at the Museum of Civilization

e-Health Conference Secretariat

Telephone: 604 688-9655 ex. 2
E-mail: ehealthinfo@advance-group.com

2007 Pistes de Conférence

- Utilisation de DSE
- DSE: Au-delà des soins cliniques
- Confidentialité, sécurité, considérations éthiques et juridiques
- Accès électronique
- Facteurs humains et gestion du changement
- Innovation et viabilité

Points forts de la Conférence

- Progrès sans égal en matière de dossiers médicaux électroniques
- Salon commercial avec 120 kiosques
- 1ère vitrine canadienne de l'interopérabilité
- Une soirée au Musée de la Civilisation
