AS AT MARCH 8, 2002

Looking forward to seeing you at e-Health 2002!

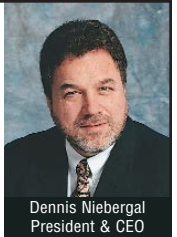

Bidinoff Marketing Inc. provides computer mounting solutions (CRT and Flat Panel) and ergonomic workstations for office and point-of-care, enabling medical personnel to access computer-based patient records. Products include Ergotron ARMS, carts, mobile workstations, wall, ceiling and floor mounts, flat panel monitors, tablet computers and batteries for wireless point-of-care systems.

Charon Healthcare, a division of Charon Professional Services Group is a trusted, and recognized Healthcare Enterprise Infrastructure technology and professional services provider. Charon specializes in server based computing services and platforms, security, networking, enterprise storage and backup, software development, hosted application services, managed services, and full enterprise resource business services. Charon serves customers through its offices from coast to coast.

Clinicare is Canada's largest provider of Electronic Medical Records (EMR) and Practice Management software for group practice physicians. Clinicare has specialized in software development for the physician market since 1984. Recent development of EMR for Windows combines the proven, enhanced patient care capabilities of prior releases of Medical Records software with the power and user friendliness of a Windows interface.

ClinSaver Software Inc. produces software that gives healthcare managers a comprehensive picture of their facilities' clinical, financial and statistical performance against industry benchmarks. Using facility data the software displays key performance indicators enabling management to make optimal decisions through performance tracking, impact assessment, and financial analyses so resources are allocated to maximize delivery of care.

Detente Systems is an international company with offices in Australia and the United Kingdom. Détente specialises in Laboratory and Radiology Information Systems for Public and Private medical facilities. Products incorporate specialist modules including Molecular Genetics, Blood Transfusion, Mortuary, Coagulation Clinic, Scheduling, Integrated Document and Image Capture and Integrated Voice Recognition.

With over a decade of experience servicing clients across North America, DINMAR is one of the largest healthcare technology solution providers in Canada. DINMAR assists clients in achieving their business objectives by providing a wide array of health care products, as well as services in the areas of management consulting, systems development, integration, and application support. www.dinmar.com

Looking forward to seeing you at e-Health 2002!
