Multinational Company Award for Corporate Citizenship McKesson Information Solutions Canada

The Multinational Company Award for Corporate Citizenship was earned by McKesson Information Solutions Canada, who were nominated for this Award independently by two different organizations. McKesson has made significant and repeated efforts to support the advancement of Health Informatics in Canada. They have assisted academic research by supporting graduate students, institutions and a variety of educational events.

McKesson personnel have given of their own time to ensure that work in the area of Health Informatics research is advanced, including obtaining access for students to participate in “real-world” situations. The company is willing to partner with customers in ways that no other vendor has and is willing to share risks and benefits with their clients.

The corporation has made significant contributions to the advancement of healthcare organizations’ information management and information technology capabilities. Their

presence in the areas of medication safety and open systems has contributed to industry advancement.

They regularly contribute to Health Informatics literature favoured by information technology leaders. They also support various industry associations including CHITTA, HIMSS Ontario, and the Canadian College of Health Service Executives.

In short, by investing in the advancement of healthcare information technology and by providing exemplary support to its clients, McKesson Information Solutions Canada has raised the bar of performance. By advancing its capabilities and demonstrating the delivery of positive impacts, our Multinational Corporate Citizen of 2005 is the catalyst for the creation of competitive offerings and leads the entire industry to grow, with the beneficiary being the healthcare system and the patients that it serves.
